

## PikoLoad

**PikoLoad** ensures the automatic download of the bulk memory of remote, download capable digital tachographs.

**PikoLoad** is distinguished through its straightforward operation and simple installation.

With **PikoLoad**, you can perform the regular downloads of bulk memory required by law automatically thus avoiding complicated personnel organization and unnecessarily long download periods. No training or extensive settings required.

Just insert your company card and connect **PikoLoad**. If required, the data can be loaded and stored on a USB flash drive. **PikoLoad** has an internal memory to store about 2 years worth of bulk memory. In addition, **PikoLoad** is able to read the driver's card inserted in the tachograph and to save data during the journey. All data are stored in a universally-recognized form and can be processed with commercially available evaluation software.

A single interface is available for data transfer for users of on-board computer systems. No complicated implementation of the functions is necessary for downloading.
